EDITOR-IN-CHIEF

F. T. BOESCH
Stevens Institute of Technology
Hoboken, NJ 07030
(201) 420-5893

EDITORS

I. T. FRISCH
Polytechnic University
333 Jay St.
Brooklyn, NY 11201

D. J. KLEITMAN
Department of Mathematics
MIT
Cambridge, MA 02139

MANAGING EDITOR

C. L. SUFFEL
Department of Mathematics
Stevens Institute of Technology
Hoboken, NJ 07030

ASSOCIATE EDITORS

M. Ball
D. Bauer
J. C. Bermond
J. Bruno
S. A. Burr
S. Chen
C. Colbourn
U. Derigs
B. Golden
M. D. Grigoriadis
J. N. Hagstrom

F. Hsu
E. Minieka
A. Nagurney
R. Oppenheim
Y. Perl
J. S. Provan
A. Satyanarayana
P. Slater
K. Steiglitz
K. Sutner
D. Towsley
R. Van Slyke

ADVISORY EDITORS

I. Cederbaum
G. B. Dantzig
R. Erdos
H. Frank
D. Gazis
D. Gillette
R. L. Graham
S. L. Hakimi
F. Harary
M. Iri
R. E. Kahn
R. Karp
D. Kettler
L. Kleinrock
E. S. Kuh
M. Schwartz
H. L. Van Trees
L. Weinberg
L. A. Zadeh

ASSISTANT MANAGING EDITOR

Rose Pehrson
Dean of the Faculty's Office
Stevens Institute of Technology
Hoboken, NJ 07030

BOOK REVIEW EDITOR

J. G. Klincewicz
Bell Telephone Laboratories
Holmdel, NJ 07733

Networks (ISSN: 0028-3045) is published seven times a year: Jan., March, May, July, Aug., Oct., and Dec., one volume per year, by John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

Copyright © 1991 by John Wiley & Sons, Inc. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 and 108 of the U.S. Copyright Law without the permission of the copyright owner is unlawful. Second-class postage paid at New York, NY, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an item in the journal indicate the copyright holder's consent that copies may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 and 108 of the United States Copyright Law. The per-copy fee for each item is $4.00 and is to be paid through the Copyright Clearance Center, Inc., 21 Congress St., Salem, MA 01970.

This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.

Subscription price (1991): $325.00 U.S.A.; $394.50 outside U.S.A. (includes postage and handling). Back volumes, microfilm, and microfiche are available for previous years; requested price list from publisher. Please allow four weeks for processing a change of address.

Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label or cite your subscriber reference number in order to expedite handling. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits.

Postmaster: Send address changes to *Networks*, Susan Malawski, Fulfillment Manager, Subscription Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. For subscription inquiries, please call customer service at (212) 850-6645 or write to the above address.

Advertising Sales: Inquiries concerning advertising should be forwarded to Roberta Frederick, Advertising Sales, John Wiley & Sons, 605 Third Avenue, New York 10158, (212) 850-8832. Advertising Sales, European Contact: Michael Levermore, Advertising Manager, John Wiley & Sons, Ltd., Baffins Lane, Chichester, Sussex PO19 IUD, England.

Manuscripts should be submitted to the Managing Editor, Professor C. L. Suffel, Department of Mathematics, Stevens Institute of Technology, Hoboken, NJ 07030. **Information for contributors** appears in the first and last issue of each volume. **All other correspondence** should be addressed to: *Networks*, Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

The contents of this journal are indexed in the following: *Compumath, Computers and Control Abstracts, Computing Reviews, Current Contents/Engineering Technology and Applied Sciences, Electrical and Electronic Abstracts,* and *Mathematical Reviews.*

Editorial Production, John Wiley: Don Simmons, Jr.

Networks

Subject Index to Volume 21, 1991

Antichains, 487

Bellman—Ford—Moore label-correcting algorithm, 29
Binary monotone system, 521
Bipartite graphs
  inequalities, 51
  maximum matchings, 165
Bipartite network, 565
Bitran—Hax algorithm, 469
Bivariate parametric analysis, 223
Blocking probability, 267
Boolean n-cube architecture, 267
Branch-and-cut algorithm, 51
Branch weight centroid, 11

Capacitated minimum cost network flow model, 689
Capacitated networks, maximum flows, 645
Capacitated p-median problem, 133
Centers, trees, 11
Centroids, 11
Chain graphs, capacitated facilities, 133
Communication reliability, 581
Conditional connectivity, 245
Connectivity, 245
Continuum of link demands, 133
Crude Monte Carlo method, 775
Cut cone, 595
Cut metrics, 595
Cut trees, 505

Dependence, computations, 521
DERIVCYC, 581
Digraph, almost acyclic, 581
Directed networks, 645
Directed trees, reliability covering problem, 345
Disequilibrium problem, 109
Double loop networks, minimal diameter, 1, 387

Dual ascent algorithm, 469
Dual-ascent procedure, 667
Dynamic breadth-first search algorithm, 29
Dynamic location problem, 313

Edge-connectivity, graph, 245
Edge failures, 321
Edges
  addition and deletion, 713
  node weighted cuts, 505

Facility locations, parametric analysis, 223
Fault-tolerant design, star networks, 373
Folding-cube network, generalized, 267
Ford and Fulkerson theorem, 595

Global convergence theorem, 109
Gomory—Hu cut tree, 505
Graphical property, hereditary, 245
Graph invariants, relations, 421
Graphs
  circular-arc overlap, 195
  directed, 505
  edge-connectivity, 245
  weighted undirected, 505

Hamming distance, 595
Hereditary properties, conditional graph connectivity relative to, 245
Hops, bounds on optimal and suboptimal, 387
Hypercube, embeddings, 595
Hypercube architecture, enhanced, 267
Hypermetricity, 595

Illiac-type interconnection networks, 1
Inequalities, facet defining, 51
Infinite families
  dense, 1
  optimal networks, 387

Karp—Orlin algorithm, 705
k-centrum, 11
k-gonal inequalities, 595
k-nucleus, 11
k-terminal reliability, 321
k-tree networks, partial, 321

Lagrangean dual, 667
Lagrange multipliers, 689
Lagrange relaxation, 689
Lagrangian dual approach, quadratic networks, 469
Lee and Preparata's algorithm, 257
L^1-embeddability, 595
Link delays, 295
Link weights, 295
Lipschitz continuity, 565
Local convergence theorem, 109

Manhattan distance, 595
Market disequilibrium model, asymmetric, 109
Market model, 109
Maximum flows, probabilistic networks, 645
Maximum independent number, series-parallel networks, 457
MFTEST, 645
Minimum average weighted length circuit problem, primal-dual algorithm, 705
Minimum-balance algorithm, 205
Minimum-balance problem, 205
Minimum flow problem, (*s*,*t* planar networks, 767
Minimum mean cycle problem, 205
Minimum weight paths, time-dependent networks, 295
Monte Carlo method, stochastic flow networks, 775
Multicommodity flow, 595
Multiphase approach, period routing problem, 747
Multistage stochastic networks, scenario aggregation algorithm, 619
Multiterminal network, 0–1 flows, 713
Multiterminal networks, 645
Multiway cut polyhedron, 51

Negative cycles, 29
Network decomposition algorithm, 109
Network equilibrium models, 109
Node failures, 321

Odd hole inequalities, 51
Oligopolistic market equilibrium problem, 565

Pair-connected reliability, 359
Parametric analysis, facility locations, 223
Parametric shortest path algorithm, 205
Period routing problem, multiphase approach, 747
Phylogeny problem, 19
Pivot paths, 205
(*s*,*t* Planar networks, minimum flow problem, 767
Planar region, univariate parametric analysis, 223
Polak—Ribiere direction formula, 469
Polyhedron, multiway cut, 51
Polynomial time algorithms, circular-arcoverlap graphs, 195
Polytopes, 595
Primal-dual algorithm, minimum average weighted length circuit problem, 705
Probabilistic graphs, uniformly optimal, 359
Probabilistic networks, maximum flows, 645
Procedure MFCL_BOUND, 775

Quadratic networks, lagrangian dual approach, 469
Quartile points, optimal hops, 387

Reduction paradigm, 321
Reliability
  communication, 581
  computations, 521
  covering problem, 345
  pair-connected, 359
  partial *k*-tree networks, 321
  uniformly-most, 417
  uniformly optimal, 181
Resilience, partial *k*-tree network, 321
Root vortex, communication, 581
Routing algorithm, 267

Scenario aggregation algorithm, multistage stochastic networks, 619
Scheduling, precedence constrained, 487
Semilattices, reliability covering problem, 345
Sensitivity analysis, 0–1 multiterminal network flows, 713
Series-parallel networks, maximum independent number, 457
Sharing problem, one- and two-commodity, 547
Shock model, 521
Shortest path, Euclidean, 257
Shortest path algorithms, using dynamic breadth-first search, 29
Spanning forests, balanced, 667
Spanning trees
  balanced, 667
  strong, 165
Standby model, 521

Star networks, fault-tolerant design, 373
Stochastic flow networks, Monte Carlo method, 775
Stochastic networks, scenario aggregation algorithm, 619
Strong spanning trees, 165

Time complexity, 645
Time-dependent networks, minimum weight paths, 295
Timing specifications, consistency and satisfiability, 91
Transmission delay, minimizing, 1
Trees
  balanced spanning, 667
  compatibility problem, 19
  determining compatibility, 19
  inequalities, 51
  inferring evolutionary history, 19
  measure of centrality of vertex, 11
  strong spanning, 165
  univariate parametric analysis, 223
Two-commodity sharing problem, 547
Two-dimensional partial orders, 487
Two-terminal network reliability analysis problem, 775

Undirected networks, 645
Uniformly-most reliable networks, 417
Univariate parametric analysis, 223
Upsets, 487

Vehicle routing problem, 747
Vertex, measure of centrality, 11

Waveform timing specifications, 91
Wheel inequalities, 51
Whitney's inequalities, 245
